

Chrome Extensions Analysis Report

Task Summary

The objective of this task was to:

1. Examine all installed Chrome extensions.
2. Identify their purpose and any associated security warnings.
3. Document extensions flagged as potentially harmful.

Installed Extensions Overview

Flash Player for Web

Description: Allows playback of Flash content in the browser.

Security Status: Warning: Not trusted by Enhanced Safe Browsing.

Forest: stay focused, be present

Description: Helps users stay focused by blocking distractions.

Security Status: Safe.

Google Docs Offline

Description: Enables offline editing and viewing of Google Docs.

Security Status: Safe.

Kaspersky Protection

Description: Provides security features for safe browsing.

Security Status: Safe.

Momentum

Description: Replaces new tab page with a personal dashboard for productivity.

Security Status: Safe.

Nucleus: A Pomodoro Timer and Blocker

Description: Timer and website blocker for productivity.

Security Status: Danger: This extension contains malware.

Security Observations

- Flash Player for Web: Marked as 'Not trusted' by Chrome Enhanced Safe Browsing. May pose a

security risk.

- Nucleus: A Pomodoro Timer and Website Blocker: Explicitly flagged as containing malware.

Immediate removal is recommended.

Recommendations

- Remove any extensions flagged as unsafe or containing malware.
- Regularly audit extensions to ensure browser security.
- Use only trusted extensions from the official Chrome Web Store.
